

**Intervention Plan on Local Roads**

Dear citizens,

A mandate has recently been given to the engineering firm Avizo in order to analyze our roads then produce an intervention plan of work to the municipality in order to improve the roads. To make this work, the Avizo employees must travel on our roads and perform several readings by taking pictures, measuring distances, checking culverts and analyzing the structure of our roads. It is therefore possible to see them parked for several minutes in the same place and make unusual operations.

The municipality wishes to notify you that their presence is quite normal.

Yours truly,

Philippe De Courval  
Director-General  
Secretary-Treasurer  
Municipality of West Bolton
